

Project Management – Telecommunications

Yurika's telecommunications business provides retail telecommunications services to government departments, local councils and commercial organisations, and is a wholesale service provider to carriers and carriage service providers.

Yurika service delivery projects are managed using proven project management methodologies delivering on time, on budget projects to enable service delivery for customers.

Yurika's project delivery methodology includes:

- Project establishment
- Collaboration with design team
- Construction
- Testing and commissioning
- Ongoing management of the infrastructure (as required).
