

Take control with **InfoDynamics - Online Service Portal Retail**

InfoDynamics - the newest addition to your team, works 24/7 assisting you to deliver actionable outcomes

Smarter business management

Yurika is one of Australia's largest metering businesses. We deliver innovative multi-utility metering, data and information business tools to maximise energy and utility efficiency which assists with cost management and compliance reporting.

Yurika has built a range of innovative products as part of its core business, providing measurement, data and information solutions.

InfoDynamics is an intuitive online data management and information reporting business tool that empowers you with answers to make informed management decisions regarding electricity, gas and water consumption.

InfoDynamics is an active resource which enables you to quickly and easily disseminate utility usage information across your company. Key personnel can be scheduled to automatically receive relevant reports that will enable issue identification and response to occur as soon as it is identified.

InfoDynamics

InfoDynamics provides you with flexible, actionable information, available at your fingertips, 24 hours a day, 7 days a week.

Efficiently receiving and processing meter data, InfoDynamics is like an additional resource to your team that will:

- Sift through huge amounts of data with ease;
- Compile, store and organise efficiently;
- Analyse, filter and report with speed and accuracy;

InfoDynamics helps retailers to manage their customer portfolios by:

- Providing access to up to three years of interval metering data online.
- Allowing you to setup reoccurring reporting schedules, on a daily, weekly, monthly, quarterly or yearly basis.
- Provides a wide range of Multi-Site Analysis reports, designed to provide insightful information across customer portfolios/brands/states.

- Allowing you to include your company's logo branding in produced PDF reports.
- Providing options to either attach produced reports to emails or to send a link to reduce email congestion.

Information at your fingertips

InfoDynamics is a tangible, actionable business tool that includes data management, a report repository, report generation and information dissemination modules.

A range of raw data exports and information rich reports are available.

About InfoDynamics

The aim of the InfoDynamics online portal is to allow you easier access to utility usage information, providing a continual and on-call information hub for utility consumption 24 hours a day, 7 days a week.

InfoDynamics has a simple yet flexible user interface which allows you to view Data and Reports. All outputs generated are saved to the online Report Repository.

InfoDynamics - the newest addition to your team, works 24/7 to assist you to deliver actionable results

Metering Dynamics is one of Australia's largest metering businesses. We deliver innovative multi-utility metering, data and information business tools to maximise energy and utility efficiency which assists with cost management and compliance reporting.

Metering Dynamics has built a range of innovative products as part of its core business, providing measurement, data and information solutions. The latest product to be offered by Metering Dynamics is **InfoDynamics**, the **InfoDynamics** website has been created in close conjunction with our valued customer base.

InfoDynamics is an intuitive online data management and information reporting business tool that empowers you with answers to make informed management decisions regarding electricity, gas and water consumption, no matter where you are 24 hours a day.
