Revitalise your
outlook with
**near RealTime
(nRT) data**

near RealTime (nRT) data

Revitalise your outlook with the near RealTime (nRT) data solution, providing 24/7/365 access to five* minute interval data, therefore assisting you make timely informed decisions in response to excess or unusual consumption

Smarter business management

Yurika is one of Australia's largest metering businesses. We deliver innovative multi-utility metering solutions to maximise energy and utility efficiency which assists with cost management and compliance reporting.

Yurika has built a range of innovative products as part of its core business, providing measurement, data and information solutions. One of the key solutions provided by Yurika is the measurement and availability of near RealTime data.

near RealTime data

The near RealTime data solution allows the provision of data in shorter and more frequent intervals, resulting in access to calculated usage and demand data minutes after consumption.

When Yurika' meters are configured for near RealTime data, usage data is extracted from the meter every 5 minutes* and delivered directly to; Yurika' data repository, customer systems and /or third parties.

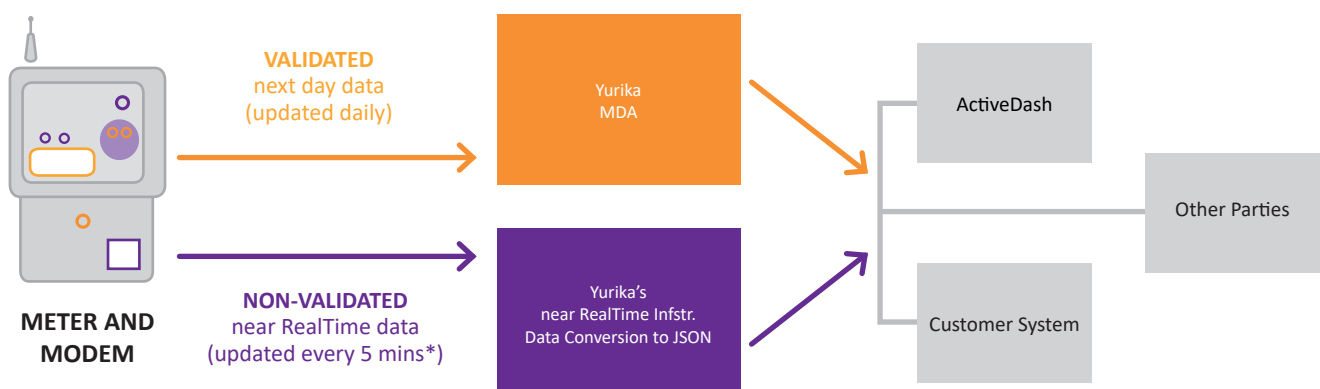

In addition to quicker data delivery, the provision of shorter interval lengths (5 minutes*) allows customers to visualise a well-defined usage profile in comparison to the standard 15 or 30 minute profile period.

near RealTime data can enhance your ability to manage individual sites or benchmark 'like' sites

Access to regularly refreshed near RealTime data may allow you to;

- Investigate site issues in near real-time
- Make informed demand management decisions in near real-time
- Take immediate action to reduce consumption or demand when exceptions are met
- Conduct site audits with up to date data
- Benchmark 'like' sites in near real-time

near RealTime (nRT) data flow diagrams

*5 minutes is the standard interval length configured for near RealTime, this may differ on occasion.

Our existing customers have already seen the difference that Yurika and near RealTime data has made to their operations.
